PMP® Certification Training Course

Authorized Training Partner

Course Overview :

Project Management Professional i.e. PMP certification is regarded as the premium certification of all project management certifications across the industry. This certification is recognized across the globe and the demand for the same is increasing day by day. As Project Management Professionals are always in demand, this demand and supply gap results in a very handsome pay scale for certified project managers.

The PMP certification exam is considered one of the most difficult examinations to crack in the world, it requires guidance by an expert, rigorous self-studies, patience, consistency and adequate knowledge of the course. The PMP certification training is offered by the Project Management Institute (PMI) which is also the governing body of the PMP certification and Eureka Learnings is the Authorized Training Partner (ATP) of the PMI.

The PMP acknowledges candidates skilled at managing the people, processes, and business priorities of professional projects. PMI, the world's leading authority on project management, created the PMP to recognize project managers who have proven they have project leadership experience and expertise in any way of working.

16% Higher

Median salary for PMP holders globally (and 32% higher in the USA) than those without certification.

25 M

New project management professionals needed to meet global talent demands by 2030.

12 M

New employees driven by expansion, and a growth of 13 million by retirements..

Accelerate "Project Management Professional" Label

A project management professional (PMP) is a skilled individual who leads and guides projects from conception to completion.

PMPs are the backbone of successful projects. They wear many hats, acting as:

Planners: Defining project scope, timelines, budget, and resource allocation.

Communicators: Keeping stakeholders informed, managing expectations, and ensuring clear communication channels.

Organizers: Breaking down work into manageable tasks, assigning them to team members, & creating project schedules.

Risk Managers: Identifying and mitigating potential project risks.

Leaders: Motivating and guiding teams, fostering collaboration, and resolving conflicts.

Problem-Solvers: Adapting to challenges, finding solutions, and keeping projects on track.
